Barranquilla, Atlántico, Colombia

PROFESSIONAL SUMMARY

Systems Engineering student at Universidad de la Costa (expected Dec 2026). Internship at Banco Serfinanza: backend and frontend development with Python and SQL Server, including UbiGo, in production since Sep 7, 2026. Personal projects with FastAPI and PostgreSQL deployed with CI/CD. English C1 (EF SET).

TECHNICAL STACK

Backend / APIs	Python (advanced), FastAPI, Node.js/Express, NestJS, REST APIs, SQLAlchemy, Alembic
.NET	C#, .NET / ASP.NET Core Web API, Entity Framework Core, LINQ
Databases	PostgreSQL, SQL Server, MySQL
DevOps & Quality	Docker, GitHub Actions (CI/CD), Pytest, OpenAPI, Git, AWS, Azure, Vercel, Render
Frontend	JavaScript, TypeScript, React, HTML, CSS, Tailwind CSS, Angular
Automation & Data	Python scripts, Streamlit, Power BI
Methodologies	Scrum (Product Backlog, Sprints), Trello boards

EXPERIENCE / PROJECTS

Banco Serfinanza S.A. — University Intern (Software Development)
Apr 2026 – Oct 2026

Python, JavaScript, SQL Server — University internship

- Contributed to UbiGo, a web application for card inventory and traceability across nationwide branches (frontend, programming logic and SQL Server); launched to production on Sep 7, 2026.
- Automated processes with Python scripts, such as cleaning and transforming supplier matrices.

Turnos — Multi-role booking platform
Personal project

Python, FastAPI, PostgreSQL, React, Docker, GitHub Actions — github.com/jasserav7/turnos-booking-platform

- Built and deployed to production a platform with three roles (client, professional, admin): web on Vercel, API in Docker on Render and PostgreSQL on Neon.
- CI/CD with GitHub Actions (lint, type checks, build and 126 tests) and transactional emails via SMTP with Brevo.
- PostgreSQL exclusion constraint to prevent double bookings; JWT authentication with rotating refresh tokens.

DataFlow — Data import and validation API
Personal project

Python, FastAPI, PostgreSQL, JWT, Pytest — github.com/jasserav7/dataflow

- REST API that imports and validates customers from CSV row by row and exports the rejected records.
- JWT authentication with password hashing (passlib/bcrypt) and unit tests with Pytest.

CarRental API — Car rental REST API
Personal project

C#, .NET 10, ASP.NET Core Web API, SQL Server, Entity Framework Core — github.com/jasserav7/CarRentalAPI

- CRUD for cars and users and a rentals module with date validation, overlap detection to prevent double rentals, and automatic total price calculation.
- EF Core (Code First and migrations); DTO pattern, dependency injection, async/await, semantic HTTP status codes and OpenAPI.

STRYDE Footwear — Microservices backend
Technical assessment

Python, FastAPI, MySQL, JWT — github.com/jasserav7/prueba-tecnica-backend

- Microservices (authentication, catalog, cart and orders) with FastAPI and MySQL, documented with Swagger/OpenAPI and covered by unit tests.

EDUCATION

Universidad de la Costa, CUC
Feb 2022 – Dec 2026 (expected graduation)

Systems Engineering · Barranquilla, Atlántico, Colombia

Degree option: Diploma in Software Technologies for Industry 4.0 — completed, certificate pending

Codetec — Administrative Assistant (Technical program)
Feb 2021 – Nov 2021

Instituto Distrital para el Desarrollo Integral Nueva Granada
Jan 2016 – Nov 2021

High school diploma

CERTIFICATIONS & LANGUAGES

Cisco · Oct 2026	Python Essentials 1 (verify) and Python Essentials 2 (verify)
English	C1 Advanced · EF SET (63/100), Feb 25, 2026 — cert.efset.org/g91icA
